# color removal formula

## MIXING

- 2 scoops BLAZING X-tra Light Booster Concentrate into a non-metallic mixing bowl
- Add 2 oz BLAZING Oil Lightener and mix until activator dissolves
- Add 2 oz PURE OXI Developer (refer to Color Removal Formulation Chart to determine volume of developer)
- Whip to a gel-like consistency

## APPLICATION

*Removing haircolor from a specific area*

- Apply formula to damp hair, beginning in the darkest area
- Take ½" partings and work through hair until completely saturated
- Heat may be used for off-the-scalp applications only

*All over removal of haircolor*

- Apply using a virgin application technique
- Start ½" from the scalp and pull mixture through the ends
- Apply to scalp during the last few minutes of the processing cycle (do not use heat)

## PROCESSING

- Refer to Color Removal Formulation Chart for recommended processing time
- Test strand frequently to monitor processing

## REMOVAL

- Wash hair with preferred Scruples shampoo
- Apply NO H2O2 No Peroxide and rinse after 3 minutes
- Condition hair with preferred Scruples conditioner
- Re-color hair with TRUE INTEGRITY Opalescent Colour Creme or HIGH DEFINITION Gel Color if desired
